

**On-wall humidity and temperature sensors (± 2.0 %),
compact form, calibratable, with multi-range switching,
with active output (Automatic Output Switching)**

Patented quality product (AOS patent no. DE 10 2015 015 941 B4)

Calibratable on-wall humidity and temperature sensor **HYGRASGARD® AFF-SD / AFTF-SD** (± 2.0 %) with active output, in an impact-resistant plastic housing with quick-locking screws, with a plastic sinter filter (exchangeable), to exactly detect the relative humidity (0...100 %RH) and the temperature with 4 switchable measuring ranges (max. -35 °C/-31 °F to +80 °C/+176 °F), optionally with/without display. The standard display can be changed from SI [°C] to imperial [°F] units via DIP switch. The measuring transducer converts the measured variables into a standard signal of 0-10V or 4...20mA. The unit with **Automatic Output Switching** (AOS variant) detects the required output type and **automatically** switches to U or I output. Alternatively, a **type version** (I2W) with 2-wire connection and I output is available. The on-wall sensor is applied in a non-aggressive, dust-free environment. It is used in the refrigeration, air conditioning and clean room technology, engineering rooms, hotels and conference facilities. A long-term stable, **digital humidity and temperature sensor** guarantees exact measurement results. The sensor is factory-calibrated; an environmental precision adjustment by an expert is possible.
